EDUCATION

University of Texas at Dallas

Richardson, TX

B.S. in Computer Science; GPA: 3.36

Expected May 2027

- **Coursework:** Data Structures & Algorithms, Database Systems, Digital Logic & Computer Design, Computer Architecture, Systems Programming in UNIX, Functional Programming & Paradigms, Probability and Statistics, Linear Algebra, Computer Networks, Software Engineering

EXPERIENCE

Software Development Engineer Intern

June 2026 – Aug. 2026

Amazon

Seattle, WA

- Engineered a new customer-facing front-end feature for **Amazon Photos** using **React**, **TypeScript**, and **Redux Toolkit**, built to reach Amazon's **200+ million** Prime members worldwide
- Wired front-end views to internal service APIs and connected components to the Redux store using **React-Redux**, modeling complex async state while partnering cross-functionally with Product, UX/Design, and backend Service teams to scope requirements and align on technical design
- Authored **Jest** test suites and leveraged Amazon's internal experimentation and release pipelines to validate functionality and support a safe, phased rollout ahead of general availability

Software Engineering Intern

May 2025 – Aug. 2025

Core Integrative Health

Dallas, TX

- Architected patient financial management system in **Python Flask** processing **100+** records weekly, reducing manual data entry time by **50%** through automated payment and insurance claim tracking
- Automated patient follow-up workflows generating templated outreach, improving callback rates by **40%** and reducing late or missed payments by **30%**

PROJECTS

CourseSync | Python, Discord.py, Playwright, BeautifulSoup, Supabase, Docker, Render

- Developed **Discord bot** tracking **1,800+ class sections** with instant DM notifications when seats open, implementing intelligent rate limiting to prevent notification spam
- Engineered multi layered scraping with **Playwright** automation, **BeautifulSoup** token extraction, and **curl_cffi** TLS masquerading as automatic fallback chain bypassing CAPTCHA with **100% reliability**

SpotFinder | React, Vite, Zustand, Leaflet.js, Node.js, Express, Supabase, Render, Vercel, Cloudinary

- Built geolocation platform connecting people with third spaces using **React concurrent features** and **Leaflet geospatial clustering** to render **1000s of locations** with real time check ins
- Implemented efficient **geospatial queries** using **PostgreSQL's** built in functions to calculate distances, achieving sub **100ms response times** for nearby location searches within customizable radius

DevHub | React, Vite, Tailwind CSS v4, Zustand, Socket.io, Node.js, Express, Supabase, Render, Vercel

- Engineered API security platform performing automated **OWASP Top 10** scans detecting **SQL injection**, **XSS**, and security header misconfigurations across **200+ endpoints** with **94% accuracy**
- Implemented **24/7 monitoring** using **node cron** for health checks every **5 minutes**, tracking uptime and response times with real time **WebSocket alerts** via **Socket.io**

TECHNICAL SKILLS

Languages: Python, Java, C++, C, JavaScript, TypeScript, SQL, HTML/CSS, SCSS, Bash, R, Lisp, Haskell, Verilog, Assembly

Frameworks & Libraries: React, Redux Toolkit, React-Redux, Node.js, Express, Flask, Discord.py, Playwright, BeautifulSoup, curl_cffi, Leaflet.js, Zustand, Socket.io, Recharts, Tailwind CSS, JWT, Helmet, express-validator, Jest

Developer Tools: AWS, Git, Docker, Linux/Unix, PostgreSQL, Supabase, Render, Vercel, Vite, VS Code, Postman, Jira

Technical Areas: Full Stack Development, RESTful API Design, Web Scraping & Automation, Geospatial Data Processing, Real Time Systems, Security Testing, OWASP Vulnerability Analysis, DevOps, Containerization, Microsoft Office

Leadership & Activities: Speech and Debate Club President (60+ members), Cybersecurity Club Member

Interests: Painting, Reading Philosophy (currently re-reading Kafka), Guitar, Rock climbing, and Weight Lifting
